

AAFPS 'Rhinoplasty and Lasers – The Cutting Edge'

26-27 March 2010

Sydney Hospital
Frank Claffy Lecture Theatre
1st Floor, Sydney Hospital

For the first time the AAFPS is having a meeting with a very different flavour on each day. Day 1 will focus on Lasers and light technologies. As well as lectures there will be considerable time devoted to panel discussions and forums. We feel that more is learnt when you get to ask the questions you want answered with a more open dialogue. Day 2 will be devoted to rhinoplasty. This will give us the chance to cover the topic in some detail leading to real, practical knowledge that can be put directly to use.

We look forward to a true multi-specialty meeting with Dermatologists, Plastic Surgeons, Cosmetic Surgeons & Physicians and Facial Plastic Surgeons all participating and adding to a "Cutting Edge" learning experience.

International Speaker – Dr David Ellis MD

Dr Ellis is a past President of the Canadian Academy of Facial Plastic Surgery, Canadian Vice President of The American Academy of Facial Plastic & Reconstructive Surgery, and the President and Secretary of The Canadian Society of Otolaryngology - Head & Neck Surgery. Recently, he was on the Board of The American Academy of Facial Plastic & Reconstructive Surgery and has been nominated for President. He is keenly sought after, world wide, as a headline speaker on the art of rhinoplasty and for his vast experience in the use of Lasers on the face. We are very excited to have Dr Ellis in Sydney to be our lead speaker on both days of our meeting.

For more information on Dr Ellis visit his website at <http://www.artoffacialsurgery.com/>

Key Speakers

Dr Phillip Bekhor FACD

Founding Director of the Dermatology Laser Unit at the Royal Children's Hospital, Dr Bekhor has been at the forefront of vascular Laser research for over 25 years. With more than 15 years of private cosmetic Laser clinic experience we are proud to have Dr Bekhor as a key speaker and discussion leader on our Laser day.

Dr Tony Moore FRACS

Dr Moore was an early adopter of Laser technology and introduced Lasers into the Plastic and Reconstructive Surgery training curriculum. With two decades of experience he has seen Laser trends come and go and we are very glad to have him as a speaker and leading discussions on our Laser day.

Convenor

Dr Jayson Oates FRACS, President AAFPS

Assistant Convenor

Dr George Marcells FRACS
